None will find Kinercon w tractive without sympathics study of his style and his ideas. Many will not then. Yet this little volume contains many rare jewels of thought, which if not poetry, are at least philosophy, poetically expressed. Emerain often wites in English, ideas which have more juced of an interpreter than anything that men of common thoughts could write in an unknown, tengue. This is a said fluid, but when to this is added that the idea often falls to repay the labor of interpretation, the case is parallel to that of the horse which was flard to catch, and good for nothing when caught. Inherent in these defects, however, are Kancron's ments, for it is evident that wherever he is utterly incomprehensible, there he must seem both original and inimitable, since what the reader dees not on reading apprehend, he will not chim to have apprehended before, but will admit to be original, and what the reader dees not on reading apprehend, he will not chim to have apprehended before, but will admit to be original, and what he does not understand be can hardly hope to imitable. To this obscurily there are agreed the following beautiful poen:

**Mhott, Lea, Willard Horner, Berlaw, Pilot, Pousseed the land which residence to their test filter, corn, roots, hemp, last, apples, wool, and pack of these besidences and and an asset, we have the remains of these besidences and any asset. instead of issuing it, as would be the case now, upon the greatest dissister of the war!"
